GUILHERME PAVANI SAPATEIRO

Fullstack Developer | React, TypeScript, Node.js, PHP, Laravel

guipavanis2@gmail.com https://www.linkedin.com/in/guilherme-pavani-06271729b/ +55 11 95004-49668 https://github.com/gui-pavas http://pavas.dev.br

PROFILE

Fullstack Developer with experience in building scalable, data-driven web applications, primarily using React, TypeScript, Node.js, and Laravel.

Experienced in developing real-time systems, including telematics data processing, device integration, and geospatial visualization through interactive maps.

Worked across multiple products within the same company, ranging from vehicle tracking platforms to ERP systems, contributing to architectural decisions, code organization, and continuous technical improvement.

PROFESSIONAL EXPERIENCE

Buscalog LTDA — Fullstack Developer

Jan 2024 — Atual

Worked across multiple company products, including a real-time telematics platform (Buscalog) and an internal ERP system (Cifra ERP).

Plataforma Buscalog (Telemetria em tempo real)

- Development and maintenance of a production vehicle tracking application using React, TypeScript, Bun, Laravel, and PostgreSQL
- Implementation of interactive maps using React Leaflet integrated with real-time data
- Integration with devices via TCP/IP, including processing of protocols such as GT06
- Use of Redis to optimize read operations and reduce bottlenecks in high-volume data flows
- Geospatial data modeling with PostGIS and time-series data handling with TimescaleDB
- Integration with backend APIs (Laravel/PHP), ensuring consistency and efficiency in data flows
- Acted as a frontend technical reference, supporting architectural decisions and team evolution

Cifra ERP (Administrative System)

- Development of features for an ERP system focused on financial management and internal processes
- Development of administrative interfaces using Laravel and Livewire
- Implementation of operational workflows focused on productivity and organization
- Standardization of the development environment using Docker, reducing inconsistencies and improving development workflow
- Organization and evolution of business logic, improving code sustainability and adaptability

EDUCAÇÃO

Universidade São Caetano do Sul (USCS) | JAN 2025 — DEC 2030
Bachelor's Degree in Computer Engineering (In Progress)

Colégio Pentágono | JAN 2022 — DEC 2023
High School + Technical Degree in IT

ETEC JÚLIO DE MESQUITA | JAN 2022 — JUN 2023
Technical Degree in Electronics

SKILLS

Frontend — React, TypeScript, Redux TailwindCSS, Liveware

Backend — Node.js, PHP, Laravel

Databases — PostgreSQL PostGIS, TimescaleDB, Redis

Other — Figma, Docker, TCP/IP, WebSockets, APIs REST, Github Actions (CI/CD)

Languages — Inglês avançado
